

## **Hybrid collection™. Pioneered by Labrie.**

The EXPERT(t) 2000 Helping Hand™ is a drop frame, side loading unit perfectly adapted for manual or fully automated refuse or recycling collection operations on both sides. Also, if you have one way streets, the operator will always be in the same direction than the traffic.

## **Versatile. Optimized unit ownership.**

The EXPERT(t) 2000 Dual Helping Hand™ is one of the most versatile units available on the market. Any municipality or private hauler that needs to pick up bags curbside or street side will still have the right unit for the job when switching to an automated collection program. This units fulfil the industry's evolving demands for years to come.

## **Highly flexible.**

### **Maximized operations.**

The EXPERT(t) 2000 Dual Helping Hand™ contributes to optimizing collection operations by picking up bags or different-sized containers and carts found on practically any type of route .

## **Best payload.**

### **Maximum productivity.**

How come it has the best compaction and load distribution available on today's market? Its tapered body means it can collect more houses on the same legal payload and ensures facilitated dumping.

## **Short walking distance.**

### **Maximum efficiency.**

The short walking distance from the cab, and shorter wheelbase (shorter than any other manufacturer) make the EXPERT(t) 2000 Dual Helping Hand™ the most efficient dropframe, dual side loading collection unit on the market.

## **Reduced fuel consumption & noise pollution.**

### **Maximum enviro-proficiency.**

With its dual Helping Hand, it is possible to collect with one-pass in alleys even if carts are left on both side. Best-in-class hydraulics mean less overheating and less demand on the engine.
